

International Trip Support

TMS^{evolution}™

UAS TMS^{evolution} is a powerful Trip Management System that gives you real-time access to mission critical information about your trip support requests, anytime, anywhere.

UAS TMS^{evolution} is a web and mobile-based trip planning application that alerts you with instant notifications and updates on all aspects of solution requests made through **UAS**. The user-friendly application saves you time and gives you greater control over the status of your services, all free of charge.

UAS TMS^{evolution} is part of the **UAS Evolution®** suite - a groundbreaking set of aviation solutions designed for specific industry needs. The **UAS Evolution** technology suite aims to provide the most customized and responsive solutions to clients' unique requirements, no matter how complex. That's why we've created some of the most sophisticated and user-friendly operational tools on the market.

UAS TMS^{evolution} puts the power in your hands allowing you to effortlessly plan your missions with **UAS**. For more information, see uas.aero/uas-tms

With UAS TMS^{evolution} you get:

- Real-time progress tracking of your service requests
- Instant flight status checks on-demand
- Updated permit numbers the minute they are obtained
- Aircraft movement status push notifications to your mobile device
- Immediate ability to see flight time
- All handling, fuel, and service confirmations
- Direct access to all third-party contact information
- Options to create multiple users to collaborate with team members
- Easy downloading and emailing of trip briefs
- Capacity to save all fleet details and documents in one place
- Detailed inventory of past flights and/or requests

TMS^{evolution} Benefits include

- Greater autonomy through instant access to all developments in your solution requests
- Saves time and avoid stress through real-time alerts on permits and service confirmations
- Limits administration needs through automatic documentation of all **UAS** mission details
- Convenience and ease through direct feedback to the **UAS** team about any specific trip or solution
